### Bachelor's degree

📅 09/2021 - 02/23

📍 Brno University of Technology, Brno

Study programme: Telecommunication and Information Systems

### Bachelor's degree

📅 09/2016 - 09/20

📍 Soš Polytechnická, Zlate Moravce

### Vocational school with maturita exam

## ABOUT ME

I'm a 23-year-old student of Computer Science at the Brno University of Technology. My deep fascination with technology, especially in the realms of system programming and computer hardware, stems from my innate curiosity. Previously, I studied Telecommunications and Information Technology for a year and a half at the same university. During this time, I gained valuable hands-on experience at SMS Infocomm, specializing in motherboard repairs for laptops. I'm communicative and thrive on learning new things, always eager to support others in my field. Whether it's a high-pressure environment or a laid-back atmosphere, I adapt well and am willing to dedicate myself fully to projects, even working through day and night when necessary.
